Job Description:

Security Technologies Leader (New Health Care company)

3M is establishing two industry-leading companies, creating value through the spin-off of its Health Care business, while 3M will continue to be a global material science leader, focusing our innovation to win in favorable global megatrends and attractive end markets. This new Health Care Company will be a leading global diversified health technology company with:

- Proven category leadership
- Exposure to attractive end-markets
- Innovation mindset driving improved patient outcomes
- Collaborative customer relationships
- Deep global regulatory experience
- Operational excellence and strong cash flow
- Strong sales growth and profitability with significant recurring sales

We expect the creation of the two companies will be completed by the end of 2023. For now, we will continue to operate as one global company. This role is positioned to drive the success of the “New Health Care Company”.

This position provides an opportunity to transition from other private, public, government or military experience to a 3M career.

The Impact You’ll Make in this Role
As a Security Technologies Leader you will have the opportunity to tap into your curiosity and collaborate with some of the most innovative and diverse people around the world. Here, you will make an impact by:

- Leading the spectrum of physical security systems and technologies including electronic access control, security video (CCTV), electronic key management, lobby intercom and visitor management systems.
- Aligning technologies to business needs through the development and execution of strategic technology roadmaps.
- Defining and implementing global physical security technology policies, standards, and procedures.
- Defining and executing an operational strategy that results in reliable, high-performing, efficient, and effective security solutions.
- Coordinating projects and resource allocation for security technology implementations across the world.
- Creating and maintaining relationships with strategic security technology integrators
- Willingness to be on-call to address critical system incidents and client support.

Your Skills and Expertise

To set you up for success in this role from day one, 3M requires (at a minimum) the following qualifications:

- Bachelor’s Degree or higher from an accredited university

OR

- High School Diploma/GED from an accredited institution and a minimum of 10 years of IT experience
- Five years of IT experience in a private, public, government or military environment
- Two years of IT experience leading an enterprise technology solution in a private, public, government or military environment
- Two years of experience in a people leader role
- Current, valid Driver’s License.

Additional qualifications that could help you succeed even further in this role include:

- Master’s degree in a relevant field from an accredited institution
- Experience or familiarity with physical security applications and technologies
- Proven IT project management skills
- Experience with systems design and data integration
• Exceptional communication skills and the ability to work and coordinate effortlessly across organizational boundaries without authority.

For current employees, internal transfer restrictions may not apply. For more details, contact your local recruiter/HR team.

Work location:

• Work Your Way Eligible (Employee choice to work remote, on site, or hybrid)
Travel: May include up to 20% domestic and international
Relocation Assistance: May be authorized

Must be legally authorized to work in country of employment without sponsorship for employment visa status (e.g., H1B status).

Supporting Your Well-being
3M offers many programs to help you live your best life – both physically and financially. To ensure competitive pay and benefits, 3M regularly benchmarks with other companies that are comparable in size and scope.
