Job Description:

Senior Health Physicist (New Health Care Company)

3M is establishing two industry-leading companies, creating value through the spin-off of its Health Care business, while 3M will continue to be a global material science leader, focusing our innovation to win in favorable global megatrends and attractive end markets. This new Health Care Company will be a leading global diversified health technology company with:

- Proven category leadership
- Exposure to attractive end-markets
- Innovation mindset driving improved patient outcomes
- Collaborative customer relationships
• Deep global regulatory experience
• Operational excellence and strong cash flow
• Strong sales growth and profitability with significant recurring sales

We expect the creation of the two companies will be completed by the end of 2023. For now, we will continue to operate as one global company. This role is positioned to drive the success of the "New Health Care Company".

This position provides an opportunity to transition from other private, public, government or military environments to a 3M career.

The Impact You’ll Make in this Role
As a Senior Health Physicist, you will have the opportunity to tap into your curiosity and collaborate with some of the most innovative and diverse people around the world. Here, you will make an impact by supporting the global use of ionizing and nonionizing radiation in manufacturing and lab environments through integrating fundamental radiation safety principles into the development and implementation of radiation safety programs, procedures, and training.

Primary Responsibilities include but are not limited to the following:

• Developing and implementing radiation safety programs, procedures, and training
• Ensuring safety and compliance through licensing, hazard assessment, controls, and radiation protection regulatory audits
• Improving radiation safety and compliance culture through modeling appropriate behaviors, coaching, and mentoring
• Collaborating with radiation source users, principal investigators, and EHS professionals as part of the corporate radiation safety team
• Participating and/or leading EHS audits to support the company’s EHS management standards

Your Skills and Expertise
To set you up for success in this role from day one, 3M requires (at a minimum) the following qualifications:

• Bachelor’s degree or higher in physical science, engineering, health physics, or medical physics (completed and verified prior to start) from an accredited institution
• Two (2) years of operational radiation safety experience in at least one of the following: developing, implementing, or auditing radiation safety programs, maintaining radioactive material licenses or radiation machine registrations, performing radiation surveys, developing radiation safety procedures, providing radiation safety consultation to radiation source users, or developing and delivering radiation safety training (private, public, government or military environment)

Additional qualifications that could help you succeed even further in this role include:

• Master’s degree in health physics (completed and verified prior to start) from an accredited institution
• Certification from American Board of Health Physics, National Registry of Radiation Protection Technologists, or Board of Laser Safety
• Course work or experience in nonionizing radiation safety
• Experience in radiation safety, using, or servicing industrial or research radiation machines and/or Class 4 lasers in a private, public, government or military environment
• Effective communications with operations and/or research personnel, EHS professionals, and regulators
• Knowledge of radiation control regulations
• Knowledge of radiation machine, laser, and/or other radiation-related industry standards
• Experience in applying radiation control techniques
• Adherence to safety practices at industrial and research facilities
• Attention to detail, and strong project management and prioritization skills
• Experience with Microsoft Office Suite

Work location:
Work Your Way Eligible (Employee choice to work remote, on site, or hybrid)

Travel: May include up to 25% domestic/international
Relocation Assistance: May be authorized

Must be legally authorized to work in country of employment without sponsorship for employment visa status (e.g., H1B status).

Responsibilities of this position may include direct and/or indirect physical or logical access to information, systems, technologies subjected to the regulations/compliance with U.S. Export Control Laws.

U.S. Export Control laws and U.S. Government Department of Defense contracts and sub-contracts impose certain restrictions on companies and their ability to share export-controlled and other technology and services with certain "non-U.S. persons" (persons who are not U.S. citizens or nationals, lawful permanent residents of the U.S., refugees, "Temporary Residents" (granted Amnesty or Special Agricultural Worker provisions), or persons granted asylum (but excluding persons in nonimmigrant status such as H-1B, L-1, F-1, etc.) or non-U.S. citizens.

To comply with these laws, and in conjunction with the review of candidates for those positions within 3M that may present access to export controlled technical data, 3M must assess employees’ U.S. person status, as well as citizenship(s).

The questions asked in this application are intended to assess this and will be used for evaluation purposes only. Failure to provide the necessary information in this regard will result in our inability to consider you further for this particular position. The decision whether or not to file or pursue an export license application is at 3M Company’s sole election.

Supporting Your Well-being
3M offers many programs to help you live your best life – both physically and financially. To ensure competitive pay and benefits, 3M regularly benchmarks with other companies that are comparable in size and scope.
