The Department of Chemistry and Fermentation Sciences at Appalachian State University is seeking to expand its faculty in the area of Introductory Chemistry. This position is a Lecturer position, Non-Tenure Track rank, and will begin January 17, 2023.

The successful candidate is expected to provide instruction (online and/or in-person) in introductory chemistry and, optionally, other advanced courses dependent on the candidate's area of expertise. The candidate will hold office hours for students, foster a risk-based chemical safety approach, and perform the other normal duties associated with teaching. Candidates will be expected to engage in relevant service activities, and to promote diversity and inclusive excellence.

The Department of Chemistry and Fermentation Sciences is committed to excellence in undergraduate teaching and scholarship, and to building a faculty that reflects the diversity of both its students and the careers for which it is preparing them. Applications are currently being accepted with application review to begin on October 10th. To apply for this position, please refer to the following link: https://appstate.peopleadmin.com/postings/35616.

A hidden gem in the University of North Carolina System, Appalachian State University has been lauded in national publications as a premier undergraduate institution in the southeast U.S. Appalachian enrolls over 20,000 students, has a low student-to-faculty ratio, and offers more than 150 undergraduate and graduate majors. Located in North Carolina’s beautiful Blue Ridge Mountains, the region around Appalachian State offers exceptional outdoor recreational opportunities.

Any questions regarding the position can be referred to the search committee chair: Jefferson E. Bates at batesje@appstate.edu.
