Faculty teaching positions, non-tenure track

The Chemistry Department at Boston College invites applications for assistant, associate, or full professor of the practice teaching positions, depending on the applicant’s experience. These are non-tenure track positions that typically are on three-year renewable contracts. Successful candidates are expected to be able to teach introductory level chemistry courses in multiple areas, as well as higher level courses in their areas of expertise, if the opportunity arises. Assignments may include General Chemistry, Organic Chemistry and/or upper level electives for students who major in chemistry or related disciplines. Responsibilities may also include the development and oversight of laboratory courses or involvement in the Boston College Gateway Scholars Program for STEM students that supports first-generation and students of color through foundational courses in science.

Qualifications:

- Ph.D. degree in chemistry or related discipline.
- Demonstrated ability to be an effective teacher.
- A reasonably diverse range of teaching experience is highly desirable.
- Demonstrated commitment to increasing diversity in science.

Applicants must submit the following documents via the online system at http://apply.interfolio.com/90486: a cover letter, curriculum vitae and a statement of teaching philosophy. In the cover letter, the names of professional references should be specified, along with their contact information.

Boston College conducts background checks as part of the hiring process.

All application materials must be submitted electronically on or prior to October 15, 2021.

*Boston College is a Jesuit Catholic university that strives to integrate research excellence with a foundational commitment to formative liberal arts education. We encourage applications from candidates who are committed to fostering a diverse and inclusive academic community.*
