Calvin University – Chemical Engineering Professor of Practice

Calvin University invites applications for a full-time professor of practice faculty member to join the Engineering Department to teach chemical engineering beginning in August 2024.

Calvin University offers an ABET-accredited Bachelor of Science in Engineering (BSE) degree with six concentrations and seeks faculty members who affirm the Christian faith as expressed by the Reformed confessions and who have academic and personal qualifications for teaching and professional/scholarly work. Ideal candidates will hold a PhD or other terminal degree in chemical engineering or a related field. Teaching assignments will include multiple upper-level undergraduate courses and labs in chemical engineering (particularly thermodynamics, kinetics/reactor design, and mass/heat transfer) as well as some courses at the 100 and 200 level in the general engineering curriculum.

Additional details and instructions to apply can be found here. Questions can be addressed to Gayle Ermer, Engineering Department Chair (gayle.ermer@calvin.edu).
