Ecolab is seeking a **Senior Chemist** to join our Life Sciences RD&E team in Eagan, MN.

What's in it For You:

- The opportunity to develop and deliver innovative products and best-in-class Personal Care and Pharmaceutical cleaning support for the North American Life Sciences RD&E team.
- The opportunity to work closely with a broad range of functional teams, internal and external suppliers, pharmaceutical and personal care industry thought-leaders and customers to create innovative solutions that meet customer needs and drive continued growth of the Life Sciences Division
- The opportunity to explore and research new ideas and technologies, responding to the current and future needs of our customers and emerging trends in pharmaceutical and personal care manufacturing
- The opportunity to work directly with customers and Industry Associations to answer questions, solve problems, and be a thought-leader in the pharmaceutical and personal care industries
- The opportunity to take on some of the world's most meaningful challenges, helping customers achieve clean water, safe food, and healthy environments
- The ability to make an impact and shape your career with a company that is passionate about growth
- The support of an organization that believes it is vital to include and engage diverse people, perspectives and ideas to achieve our best

What You Will Do:

- Provide strong project management as part of the North American RD&E team and drive communication with industry experts, cross divisional technology areas and global teams
- Capture, explore, experiment, and develop innovation ideas and concepts – working in coordination with the Global RD&E, Marketing, Sales, and Regulatory teams to bring the best ideas forward
- Collaborate with our sales team to solve complex problems
- Lead projects to develop and evaluate new test methods to assess new technologies in the lab and the field using experimental design, statistics, and data analysis techniques
- Identify customer needs or emerging market trends that impact the Life Sciences divisional customers and develop proactive solutions
- Develop relationships with suppliers and inventors to leverage innovation and differentiation
- Understand Ecolab's patent landscape, expand our position and protect it as needed
- Maintain employee safety standards including 6S lab standards

Minimum Qualifications:

- Bachelor's degree in microbiology, chemistry, or related discipline
- 3 years of experience working on robust product/experimental design/data analysis
- 1 year of experience working with business and marketing teams to align new technologies/innovations to customer needs
- 1 year of experience in project management
- 1 year of demonstrated leadership experience
- No Immigration Sponsorship available for this opportunity

Preferred Qualifications:

- Master's degree in microbiology, chemistry, or related discipline
- 1 year of experience working in a regulated environment
- 1 year of experience working in personal care or pharmaceutical industries
- Experience providing technical support to a sales/service team
- Demonstrated passion for and capability in big data analytics
- Experience or knowledge of manufacturing processes and working closely with supply chain
- Experience with Quality Management Systems
- Track record of intellectual property, published work in recognized journal, or products launched on the market
- Experience working with commercial customers
- Excellent verbal and written communication skills

A trusted partner at nearly three million commercial customer locations, Ecolab (ECL) is the global leader in water, hygiene and infection prevention solutions and services.
