

## **Join a Team that Lives to Improve Lives**

People come to Genentech from across disciplines and across the world to solve our most challenging medical conditions. You'll find inspiration in our passion for biotechnology, our purpose to positively impact the lives of millions of patients and our dedication to our people. Joining Genentech means being part of a tradition of inquiry that will change the world. It means embracing our failures as much as our successes. It requires a willingness to look beyond the edge of what's possible. And a focus on doing the day-to-day work that makes great science happen.

The following opportunity exists in our South San Francisco, CA headquarters:

### **Associate Scientist/Scientist, Small Molecule Analytical Chemistry**

#### **Description**

We are seeking outstanding candidates to join our world class Research and Early Development organization as an analytical development chemist within the Small Molecule Analytical Chemistry department. Responsibilities include characterization of small molecule candidates, method development and qualification, supporting process scale-up and formulation development, release and stability testing of API and drug products. The candidate will also serve as the analytical representative to CMC Project teams.

The successful candidate will develop chiral and achiral HPLC methods, conduct assays, document studies in notebooks, summarize and interpret the data, troubleshoot instrument and method problems, present findings at team meetings and contribute to IND/NDA filings.

You will accomplish our mission through innovation and teamwork, creative problem-solving, and use of state-of-the-art technology including HPLC, LC-MS, capillary electrophoresis, UPLC, HSGC, MS (SQ, IT, TOF), IC, KF, DSC/TGA, FTIR, UV, and dissolution.

#### **Who You Are**

- PhD in a relevant scientific discipline (chemistry preferred). Pharmaceutical industry experience is a plus.
- Candidates must have good theoretical knowledge of analytical chemistry.
- Experience on chromatography (HPLC, GC, data handling), mass spectrometry, spectroscopy and/or other analytical techniques.
- Knowledge of current FDA regulations/guidance and strong background in organic chemistry, pharmaceuticals, QC and drug development process are desirable.
- Candidates should have good problem solving, written and oral communication skills.

#### **A Job with Benefits Beyond the Benefits**

A member of the Roche Group, Genentech has been at the forefront of the biotechnology industry for more than 40 years, using human genetic information to develop novel medicines for serious and life-threatening diseases. Genentech has multiple therapies on the market for cancer & other serious illnesses. Please take this opportunity to learn about Genentech where we believe that our employees are our most important asset & are dedicated to remaining a great place to work.

[Diversity and Inclusion](#) (D&I) are critical to the success of our company and our impact on society. We believe that by championing diversity of background, thought and experience, we can foster a sense of belonging and provide an environment where every employee feels valued, included, and able to contribute their best for the patients we serve. We're focused on attracting, retaining, developing and advancing our people to their full potential by rewarding bold ways of thinking and integrating inclusive behaviors into every aspect of our work.

The next step is yours. [Apply today!](#)
