THE POSITION

We are seeking a highly motivated individual for the position of Senior/Principal Scientific Researcher to join the Biochemical and Cellular Pharmacology department as part of the biophysics group supporting our small molecule drug discovery pipeline. The successful candidate will be responsible for supporting projects using biophysical approaches, especially surface plasmon resonance (SPR), to provide hit-to-lead and mechanism of action studies to early stage research and discovery programs. This individual will independently develop, validate, and perform SPR assays while acting as the group representative on small molecule project teams. The successful candidate will analyze, interpret, and present data effectively to move projects forward as part of an interdisciplinary drug discovery team.

Who you are:

The qualified individual will have a BS or MS in Biochemistry, Biophysics, or a related field with at least 5 years for Senior/8 years for Principal of relevant experience using biophysical or biochemical methods for small molecule drug discovery projects. The successful candidate will have experience in at least 1 biophysical technique (SPR, NMR, crystallography, etc.) and have a solid background in protein biochemistry and biophysics. While the work will be heavily SPR-driven previous experience with that technology is not required as long as the candidate has a significant background in rigorous precision measurement and data analysis. Individuals with strong organization and communication skills and the ability to work well as part of a team are strongly sought.

Relocation benefits are available for this position

#gRED
#Genentech

Genentech is an equal opportunity employer, and we embrace the increasingly diverse world around us. Genentech prohibits unlawful discrimination based on race, color, religion, gender, sexual orientation, gender identity or expression, national origin or ancestry, age, disability, marital status and veteran status.

Genentech requires all new hires to be fully vaccinated against COVID-19 as of their start date. This requirement is a condition of employment at Genentech, and it applies regardless of whether the position is located at a Genentech campus or is fully remote. If you are unable to receive the vaccine due to a disability or serious medical condition, or because it is prohibited as a result of your sincerely held religious beliefs, you will have an opportunity to request a reasonable accommodation.
