The MIT Department of Biological Engineering in Cambridge, MA invites applications for tenure-track faculty positions at the assistant professor level, to begin July 1, 2024 or on a mutually agreeable date thereafter. MIT Biological Engineering is a unique department that fuses molecular and cellular bioscience with quantitative engineering approaches and includes faculty and students with diverse scientific interests and backgrounds. This faculty search is open to research in all topics of biological engineering, with emphasis areas being agriculture, environment/climate, energy, or computation. Applicants should hold a Ph.D. in a science or engineering discipline related to Biological Engineering by the beginning of employment and should have demonstrated experience in biological engineering research. A more senior faculty appointment may be considered in special cases. The department culture is vibrant, creative, and collaborative, and we strive to help each member of the community reach their greatest potential. Faculty duties include teaching at the graduate and undergraduate levels, conducting research, as well as supervision, training and mentoring students and junior researchers. Candidates should be capable of instructing in our core biological engineering educational curricula.

Candidates must register with the BE search website at http://be-fac-search.mit.edu, and must submit application materials electronically to this website. Candidate applications should include a description of professional interests and goals in both teaching and research. Candidates should also provide a statement regarding their views on diversity, inclusion, and belonging, including past and current contributions as well as their vision and plans in these areas. Each application should include a curriculum vita and the names and addresses of three or more references who will provide recommendation letters. References should submit their letters directly at the http://be-fac-search.mit.edu website. Applications received by December 1, 2023, will be given priority.

Questions may be directed to: Prof. Darrell Irvine
