About NOBCChE

NOBCChE strives to promote and empower the next generation of chemists, chemical engineers and scientists in related fields.

The primary purpose of the National Organization for the Professional Advancement of Black Chemists and Chemical Engineers (NOBCChE) is to initiate and support local, regional, national, and global programs that assist people of color in fully realizing their potential in academic, professional, and entrepreneurial pursuits in chemistry, chemical engineering, and related fields in science, technology, engineering, and mathematics (STEM).

NOBCChE promotes careers in science and technology as an achievable goal for high school students, encourages college students to pursue graduate degrees in chemistry and related STEM disciplines, and provides support and development opportunities for professionals across different career stages.

The 2022 Conference will be held from September 26-29, 2022 in Orlando, FL.
