

**Saint Francis University
Faculty, Chemistry**

Search Status: Application materials received by October 22, 2021 will receive primary consideration.

The Chemistry Department at Saint Francis University invites applications for a three-year (renewable) faculty position beginning August 2022. Candidates with interests in analytical chemistry or fermentation chemistry are preferred, but strong applicants in all chemistry disciplines are encouraged to apply. Teaching responsibilities include course work and laboratories in the areas of general chemistry and allied health chemistry, as well as upper level courses in the area of specialization of the successful candidate. Opportunities to perform research with undergraduate students will also be available.

The successful candidate must have a Ph.D in chemistry, a commitment to excellence in chemical education in the classroom and in the research laboratory, and preferably post-doctoral research experience and experience in equipment maintenance. The Chemistry Department shares a 73,000 sf Science Center with dedicated research space. Departmental resources include 2 NMR spectrometers, FTIR-ATR, GC-MS, HPLC, glove box, cold room, and AFM.

Review of applications will begin late October with phone and on-campus interviews planned for early November through December. Saint Francis University is a liberal arts institution, located in Loretto, PA about a 30-minute drive from Altoona, PA and Johnstown, PA.

Apply on line at <https://francis.edu/employment>, then submit a letter of application, Curriculum Vitae, teaching philosophy, research statement, and names, addresses, and phone numbers of three references to: positions@francis.edu.

Saint Francis University is committed to diversity of students, staff, and faculty, and encourages applications from historically underrepresented individuals, women, veterans, and persons with disabilities. AA/EOE
