February 18, 2016

Dear colleague,

The Department of Chemistry at the University of Pittsburgh is pleased to announce the 2016 Summer Undergraduate Research Fellowship program (SURF Pitt 2016). Summer research opportunities are available for up to five female or minority undergraduate students majoring in chemistry who are expected to graduate in 2017. Students selected for the program will receive a stipend of \$350 per week for up to 10 weeks of summer research, beginning as early as May 23rd. Students will also be provided free housing at Pennsylvania Hall on the University of Pittsburgh campus.

Interested students are encouraged to apply on line at <http://tinyurl.com/PittChemSURF>. Applicants are required to send their cover letter, official or unofficial transcript, and a prioritized list of three Chemistry Department research groups in which they are interested. Two letters of recommendation must be sent directly to Christie Hay, gradadm@pitt.edu. Review of applications for these positions will begin in less than two weeks. We will continue to review them until all the positions are filled.

Please circulate this letter with your colleagues whose students may be interested.

We look forward to receiving applications from your department.

A handwritten signature in cursive script that reads "Kazunori Koide".

Prof. Kazunori Koide
SURF Pitt 2016 Chair
