

Position Title: Sr. Research Associate, Drug Product Process and Formulations

Department: Technical Operations

Location: San Francisco, CA

Vir Biotechnology is a commercial-stage immunology company focused on combining immunologic insights with cutting-edge technologies to treat and prevent serious infectious diseases. Vir has assembled four technology platforms that are designed to stimulate and enhance the immune system by exploiting critical observations of natural immune processes. Its current development pipeline consists of product candidates targeting COVID-19, hepatitis B virus, influenza A and human immunodeficiency virus.

We believe the success of our colleagues drives the success of our Mission. We have an ongoing commitment to creating a company passionate about equality, inclusion, and respect. When everyone feels supported and encouraged to give at their best, we will collectively deliver outstanding results.

JOB SUMMARY:

Vir Biotechnology seeks a Senior Research Associate to join the Drug Product Process Development and Formulation group. You will execute experiments to support formulation development and process development activities for early and late-stage clinical development programs.

RESPONSIBILITIES:

- Perform formulation development studies and characterization of biological (proteins, antibodies) drug product formulations using multiple analytical, rheological and biophysical techniques
- Optimize and execute in-use stability studies to support clinical administration procedures and handling instructions
- Optimize and execute experiments to support process conditions for drug product manufacturing
- Author study protocols, development reports and summarize and verify data for regulatory filings
- Work cross-functionally to support other areas of the CMC organization, such as upstream/ downstream process development and analytical/QC.

QUALIFICATIONS AND EXPERIENCE:

- MS/BS in Pharmaceutical Science, Biochemistry, Chemistry, Chemical Engineering or a related field and 2+/4+ years of experience in formulation or drug product development with monoclonal Antibodies.
- Wet lab experience with preparation of biologic drug products or formulations and analytical characterization (i.e. HPLC, CE, DSC, etc.)
- Technical writing skills and experience authoring technical protocols, development reports, SOPs or other documents.

Vir's compensation and benefits are aligned with the current market and commensurate with the person's experience and qualifications. All full-time employees receive a package that includes: compensation, bonus and equity as well as many other Vir benefits and perks such as: health, dental, vision, life and disability insurance benefits, non-accrual paid time off, one Friday a month paid-time off, company shut down for holidays, commuter benefits, child care reimbursement, education reimbursement, 401K match and lunch for all lab essential personnel!

Vir is an equal opportunity employer. We value diversity at our company. We do not discriminate on the basis of race, religion, color, national origin, sex, gender, gender expression, sexual orientation, age, marital status, veteran status, or disability status. We will ensure that individuals with disabilities are provided reasonable accommodation to participate in the job application or interview process, to perform critical job functions, and to receive other benefits and privileges of employment. Please contact Human Resources to request accommodation.

Vir Human Resources leads recruitment and employment for Vir. Unsolicited resumes sent to Vir from recruiters do not constitute any type of relationship between the recruiter and Vir and do not obligate Vir to pay fees should we hire from those resumes. We ask that external recruiters and/or agencies not contact or present candidates directly to our hiring manager or employees.
