R1567150 - Scientist, Chemical Process Development

- New Brunswick, New Jersey; Summit, New Jersey
- Drug Dev and Preclinical Studies
- R1567150

Job Description

Working with Us
Challenging. Meaningful. Life-changing. Those aren’t words that are usually associated with a job. But working at Bristol Myers Squibb is anything but usual. Here, uniquely interesting work happens every day, in every department. From optimizing a production line to the latest breakthroughs in cell therapy, this is work that transforms the lives of patients, and the careers of those who do it. You’ll get the chance to grow and thrive through opportunities uncommon in scale and scope, alongside high-achieving teams rich in diversity. Take your career farther than you thought possible.

Bristol Myers Squibb recognizes the importance of balance and flexibility in our work environment. We offer a wide variety of competitive benefits, services and programs that provide our employees with the resources to pursue their goals, both at work and in their personal lives. Responsibilities (include, but are not limited to):
Responsible for route scouting and the design and implementation of safe, efficient and robust chemical processes for the synthesis of drug candidates with the overarching goal of gathering and determining fundamental process knowledge, scaling and transitioning such processes to manufacturing.

Qualifications
Candidates must possess a strong background in the theory and practice of synthetic organic chemistry, possess excellent problem solving skills and demonstrate a thorough understanding of synthetic methods and reaction mechanisms. Candidates will have expertise in the purification and characterization of organic compounds (Chromatography and NMR, MS, IR spectroscopy). Good oral and written communication skills and a desire to work in a collaborative team environment are required. Must have a Ph.D. in organic chemistry with 0 to 3 years of additional related research experience.

Around the world, we are passionate about making an impact on the lives of patients with serious diseases. Empowered to apply our individual talents and diverse perspectives in an inclusive culture, our shared values of passion, innovation, urgency, accountability, inclusion and integrity bring out the highest potential of each of our colleagues. Bristol Myers Squibb recognizes the importance of balance and flexibility in our work environment. We offer a wide variety of competitive benefits, services and programs that provide our employees with the resources to pursue their goals, both at work and in their personal lives.

If you come across a role that intrigues you but doesn’t perfectly line up with your resume, we encourage you to apply anyway. You could be one step away from work that will transform your life and career.
