**Location:** Skillman, New Jersey; Singapore; Zug, Switzerland  
**Function:** Quality

**Job Description**

Johnson & Johnson Consumer Inc. is recruiting for a Senior Manager, Supplier Quality located ideally in Skillman, New Jersey; Zug, Switzerland or Singapore. May consider remote.

Our consumer companies produce many of the world's most trusted brands, among them TYLENOL®, MOTRIN®, LISTERINE®, NEUTROGENA®, NICORETTE®, LE PETIT MARSEILLAIS®, NEOSTRATA® and DR CI:LABO®. Each one of our consumer businesses embraces innovative science to create products that anticipate consumer needs and build experiences that help them live healthy, vibrant lives.

The Senior Manager will partner within the Consumer Health Quality organization to establish and maintain global processes for material quality, including the management of specification changes across chemical, API and packaging categories. Additionally, this position will be responsible for successful execution and serve as a specialist for auditing of suppliers, in order to maintain compliance to health authority and internal J&J standards. She or he will coordinate globally to ensure completion of audits, according to established requirements.

This individual will sit on the global Supplier Quality leadership team for J&J Consumer Health and will contribute to the establishment of strategy to achieve team objectives including proactive quality, portfolio and supplier changes, and a growing focus on digital tools to identify and resolve reliability challenges. This position will lead, develop and inspire a team of global direct reports.

- Directs a centralized program for the planning, approval and conduct of the annual audit schedule(s), the efficient coordination of auditing resources, ownership of auditing standards and procedures
- Oversight of the onsite and remote audits, the supplier audit system performance; is an audit specialist for J&J internal and health authority inspections, owns and maintains audit standards, procedures and associated documents
- Ownership of the relationship with third-party auditors
- Develops and leads strategies and initiatives to ensure material selection, qualification and changes
- Partners with R&D to ensure current and accurate specifications are in place, and handled through their lifecycle
- Works collaboratively across functions (Procurement, Operations, Quality) to implement standard processes and coordinates a team in the execution
- Ensures compliance to J&J standards and global health authority requirements
- Based upon knowledge and expertise, this role will continuously improve and build audit and material quality programs for agility and efficiency
Qualifications
Required Experience and Skills:
• Bachelor’s degree is required (degree focus chemistry, pharmacy, engineering or life sciences preferred). Advanced degree is preferred.
• A minimum of 8 years working in a technical function (e.g., Quality Assurance, Engineering, Operations, R&D) in the pharmaceutical, medical device, OTC or cosmetics industry is required.
• Direct people leadership (direct reports) is required.
• Solid understanding of cGMP is required.
• Experience working with national health authorities (i.e. FDA, MHRA, ANSM, Health Canada, ANVISA) is required.
• Ability to work independently and lead a remote team is required.
• Proven ability to collaborate with internal and external partners to build relationships is required.
• Independently prioritize a highly complex and diverse workload, ensuring timelines and objectives are met.
• Decision making authority and accountability for compliance decisions, with insight to the potential impact on customers and patients.
• Ability to value diverse perspectives and use that diversity to achieve results is required.
• A high attention to detail.
• Fluency in English.
• Up to 10% domestic & international travel.

Preferred Experience and Skills:
• Experience working in a global environment with multiple partners.
• Success working with third-party contractors or consultants.
